Description

The 12 Volt surface mounted socket (21 mm diameter) is specially designed for interior use and equipped with 2 screw terminals. This means the surface mounted socket can be positioned as desired in the vehicle and is resilient up to 16 Ampere. Therefore the socket is perfect for charging your electrical devices in your vehicle. Additionally the input socket can be secured with a rubber connection thus affording dust and splash water protection. Hence your devices are always ready for operation and your driving time is spent more productively as of now.
