

LED-warning beacon yellow 10-30 V magnetic base

Material no.: 6000002371 | Matchcode: LED KL G MAG | EAN code: 4045294269593

- » Magnetic foot with spiral cable
- » connection to cigarette lighter
- » no drilling necessary in the vehicle
- » Registration complying with ECE R65 & ECE R10-04
- » Operating voltage 10-30 VDC

Dimensions

Outer dimensions: 185 x 185 x 160 mm

Technical data

Weight: 1,39 kg

IP Protection: 67

Voltage in volts: 12
24**Conformity**

EMC Compliant: Yes

ECE mark: E4 R65

Description

These LED warning beacons are equipped with a magnetic base with which it can be flexibly positioned on the vehicle's roof. You can connect the lights via the spiral cable with plug to the on-board socket/cigarette lighter (SAE J563) without further cabling being necessary. The lights can be operated with an operating voltage of 10-30 VDC. Additionally the warning beacon conforms to ECE R65 E04 006598 as well as ECE R10-04 and thanks to the LED technology is extremely long-lasting. The yellow flashing light is used for warnings about danger. The lights emit 120 double flashes per minute. Thanks to its protection class IP67 and a temperature range of -40 to +70 °C, it is ideally suited for operations outdoors. The height is 152 mm, the diameter is 183 mm. Note: The light is only intended for temporary use. It can only be positioned on flat, horizontal and normally painted surfaces on the (steel) vehicle roof. The recommended maximum speed with lights is 110 km/h.
