**Description**

The hook made of sturdy, glass fibre reinforced plastic is designed specifically to fit the new slotted holes of the aluminium side panel of the van racking system. The hook clamps automatically into the punched out holes of the Sortimo aluminium side panel and can be simply mounted or rather demounted with one hand - without any tools. The double hook for tools 40 was specifically developed for the dynamic load in a vehicle. The two hooks have a length of 25 mm each. As a result, you can hang up various tools and supplies for work or jackets onto the aluminium side panel of the van racking system, which on the one hand has the benefit that these are tidied away quickly but on the other hand, are quickly accessible without even having to enter the vehicle.
