Description

Long-handled equipment such as, a broom or shovel can be stowed away directly under the vehicle ceiling with the overhead hook. This way you gain on loading space on the vehicle floor. The two part overhead hook is screwed onto the cross beam of the vehicle ceiling. Afterwards the long-handled equipment, can be inserted slantwise into the front holder, with the handle facing you. By lifting the end when inserting it into the rear holder, the equipment wedges itself into the front holder so that it is fixated for drive operation.

Note: To ensure when installing that no damage is caused, please be careful of electrical cables for interior lighting, which possibly run through the cross beams of the vehicle ceiling.

Overhead hook 1 broom/shovel
