Description

The pair of Aluminium rails with a length of 2 metres each serve the effortless loading of heavy and bulky payload. The running surface of the rails is non-slip coated in order to guarantee safe loading and to prevent slippage when wet. The Aluminium loading rails have a protective edge which secures the load additionally. In the fold-able version, the rails are very simply transportable while taking up next to no space.

The high load bearing capacity of a maximum of 300 daN mean even heavy objects like washing machines or tractor mowers can be quickly and easily loaded and unloaded.

Included in delivery are a pair of loading rails, so two pieces.
