Description

The two foldable aluminium ramp rails with a length of 2.5 meters each provide for effortless loading of heavy and bulky freight. The running surface of the rail is coated with an anti-slip surface in order to ensure safe loading and to prevent slipping when it is wet. The aluminium ramp rails also have a protection edge which additionally makes loading safe. The rails of the foldable variation can be transported simply and don't take up much space.

By means of the high load bearing capacity of max. 300 daN even heavy objects such as e.g. washing machines or lawn tractors can be quickly and conveniently loaded or unloaded.

The scope of delivery includes one pair of ramp rails, that means 2 pieces.

Ramp rails foldable 2.5 m
