Description

The divider 173x60 mm, used in conjunction with a divider frame and a slot divider 288x60 mm, divides the depth of the L-BOXX 102 G4 – the slot divider also subdivides the width of the BOXX in this case. To do so, simply insert the plastic adapter supplied into any recesses in the divider frame or slot divider and then insert the divider. The resulting compartments provide for greater organisation within the L-BOXX and help you towards a structured working day.
