Description

The slot divider 283x130 mm, used in conjunction with a divider frame, subdivides the width of the L-BOXX 238 G. This simply involves inserting the plastic adapters supplied into any slots in the divider frame and then re-inserting the slot divider.

The slot divider also has slots, providing additional depth division options in conjunction with a divider 173x130 mm.

The resulting compartments create more order within the L-BOXX and a structured working day.
