Description

The slot divider 354x100 mm, used in conjunction with a divider frame, divides the depth of the L-BOXX 136 G4. This simply involves inserting the plastic adapters supplied into any slots in the divider frame and then re-inserting the slot divider.

The slot divider also has slots to create additional width subdivisions when the slot divider is positioned centrally with the dividers 140x100 mm. The resulting compartments create more order within the L-BOXX and a structured working day.
