Structure & Function

Description

The L-BOXX transverse thermal divider can be used to subdivide the width of L-BOXXes 238 G and L-BOXXes 374 G fitted with a thermal insert. The divider can be inserted into the slots provided in the thermal insert. The interior depth of the BOXX can be subdivided with long dividers to create even smaller compartments. The resulting compartments are ideal for the storage of cartridges that have to transported upright.
