Description

The lid insert can be fitted into the lid of the L-BOXX G 238 and L-BOXX G 374 in conjunction with thermo inlays. It features clamping ribs, which are ideal for fixing cartridge tips in place. The insulating effect of the thermal insert protects sensitive construction chemicals from extreme temperatures. For example, glue, acrylic, silicone or PU foam are protected against the cold and can be easily transported and worked with, even at very low outdoor temperatures. The thermal insert can also be used for the storage of rolls of compression tape etc. when temperatures are very high.

Note: The item only includes the thermal lid insert. The inserts for the L-BOXX body need to be ordered separately. Depicted BOXxes and accessories are only for demonstration purposes and are not included in the scope of delivery.
