Description

The ProSafe CargoStopp in combination with the Sobogrip ProSafe floor for form-fitting load securing. It is inserted in the ProSafe floor lashing point and contains an integrated lashing point. Therefore the lashing strap can be directly hooked-in to the CargoStopp and therefore you save on an additional floor lashing point. The CargoStopp ProSafe has a locking function in addition, which prevents the CargoStopp from unintentionally slipping out of the floor lashing point. The ProSafe CargoStopp therefore enables quick and professional load securing. In order to have a permanent stop bar on the floor, the ProSafe CargoStopp can have a restraint pole screwed on to it.
