Description

The L 39 ProClick tool bag offers stowage space for hand tools and consumables of all types. The large open compartment provides an orderly location for your pliers, cutter or even a small cordless screwdriver. Thin tools, such as Allen keys and spanners, can be accommodated in the separate internal compartment.

The 15 elastic loops - nine inside and six on the outside - provide orderly and clear storage for screwdrivers. Another 16 mini-loops on the inside allow you to insert screwdriver bits and drill bits. The additional pocket on the front is compatible with the insetboxes 1x1 H63 (2 in number) or 1x2 H63 (1 in number), making it the perfect storage option for small components. A prop on the back lets you use the bag unhooked, on your workbench, for example. In addition, the L 39 offers a hammer loop, a metal hoop for carrying tools with a belt clip (such as a tape measure) and a strip loop with plug buckle which permits the hanging up of adhesive tapes.

The tool bag teams up perfectly with the ProClick Holder on your tool belt. This means that you always have the right tool and consumable to hand, and this saves lots of time when you are working up a ladder. The tool bag can also be used as a flexible and intelligent storage system on the SR5 van racking, in the C-BOXX, the tool carriage or on the AutoAssistant.
